

# CSS PROPERTIES & THEIR APPLICATION IN MY PORTFOLIO

## 1. COLOR: Control the color of text

### APPLICATION:

The text-purple-600 and text-purple-900 classes are used to set the color of text elements, such as navigation links and headings. For example, text-purple-600 sets the text color to a shade of purple.

## 2. BACKGROUND-COLOR: Control the color of background elements

### APPLICATION:

The bg-gradient-to-r from-blue-500 via-purple-600 to-pink-500 class sets a gradient background color for the header section. The bg-purple-50 class sets a solid purple background color for the portfolio section.

## 3. FONT-SIZE: Control the size of fonts.

### APPLICATION:

The text-3xl, text-5xl, text-4xl, text-xl, text-lg, and other font size classes are used to set different font sizes for headings, paragraphs, and other text elements.

## 4. FONT-FAMILY: Control the style of fonts.

### APPLICATION:

The font-extrabold and font-semibold classes are used to set the font weight (boldness) for headings and other text elements. The font-medium class is used to set the font weight for navigation links.
