PART 1: HTML & CSS

Section 1.1: HTML concepts & DOM

1.1.1 Descriptive Task

HEADER:

The header establishes the tone for the entire website and serves as the initial point of contact. It acts as the center for navigation, making it simple for users to go between the portfolio's many components. With an attention-grabbing headline and a call-to-action, the header's hero section invites readers to explore my work or discover more about me.

ABOUT SECTION

A personal introduction is given in this area so that visitors can learn more about me outside of my professional life. It draws attention to your experience, abilities, and distinctive qualities. It's an opportunity to connect personally with my audience by sharing my narrative, my passions, and the things that inspire my creativity.

PORTFOLIO SECTION

The main area of your website, where your best work is shown, serves this purpose. It's made to showcase your projects in an eye-catching way, showcasing your abilities, sense of style, and adaptability. To help prospective clients or employers understand the value you bring, each portfolio item provides a deeper dig into your creative process, outcomes, and the influence of your work.
